

New at Summit Racing Equipment: Superwinch New S Series Trailer Winches

Summit Racing now carries Superwinch New S Series Trailer Winches. New S Series winches are compact and rugged with a weather-resistant housing, which makes them a great choice for exposed flatbed or trailer installation.

Tallmadge, OH ([PRWEB](#)) July 07, 2016 -- Summit Racing now carries [Superwinch New S Series Trailer Winches](#). New S Series winches are compact and rugged with a weather-resistant housing, which makes them a great choice for exposed flatbed or trailer installation. Controls and motor access are located at the top of the winch to allow for installation into trailer wells and recesses.

The winches feature a no-coast motor so when the user lets off the remote, the winch motor stops immediately. That means the vehicle halts exactly when the user wants it to. Dynamic and mechanical brakes prevent the vehicle from rolling backwards when the winch motor stops.

Superwinch also incorporated a handy kick flip lever into the New S Series. It allows the winch's freespool operation to be engaged hands-free with simple foot pressure. Other features include an upgraded gearbox that provides better engagement and longer service life. The winches are available with 3,500, 5,500, and 7,500 pound pull ratings. Despite the power increase, they draw less current from the vehicle's electrical system.

The Superwinch New S Series trailer winches are available with either steel wire or synthetic rope. Both styles get Superwinch's "Roller Hawse" fairlead, which is compatible with both winch line types. A 30 foot wired remote is included; wireless remote options are available separately. New S Series trailer winches carry a limited lifetime warranty, with a 3 year warranty on the winch solenoid.
