

Continental Teves Chooses STR Software to Integrate Automated Information Delivery System in SAP Environment

STR Software recently won a contract from Continental Teves in Morganton, N.C. STR Software has implemented AventXÂ UNIX, an electronic information delivery software product for faxing and emailing from UNIX platforms. Continental Teves will also employ the AventXÂ SAP Connector and AventXÂ Mail for the email delivery of its purchase orders, invoices and contracts within an SAP environment.

(PRWEB) July 24, 2002 -- RICHMOND, VA Â JULY 24, 2002 Â STR Software recently won a contract from Continental Teves in Morganton, N.C. STR Software has implemented AventXÂ UNIX, an electronic information delivery software product for faxing and emailing from UNIX platforms. Continental Teves will also employ the AventXÂ SAP Connector and AventXÂ Mail for the email delivery of its purchase orders, invoices and contracts within an SAP environment. The company chose the AventXÂ product suite due to its enterprise scalability and compatibility with SAP, an enterprise resource planning (ERP) application.

STR Software of Richmond, Va., develops, markets and supports software products in electronic information delivery for host ERP applications. The company provides information retrieval, report design and creation, and delivery via a variety of channels including server-based faxing, email, direct email and outsourcing through an application service provider.
