

The Weldon Group announces the GW AutoBroker Web Portal for Auto Dealers.

The GW AutoBroker Web Portal enables a car, boat, RV, motorcycle dealership etc. to manage their community and create a catalog of their inventory in an easy to use internet offering

([PRWEB](#)) April 24, 2003 -- [The](http://www.groupweldon.ca) Weldon Group after many years experience in the auto industry has released an internet catalog specially designed for auto dealers. This auto dealer portal is designed to get the customer onto the lot.

The catalog remembers what the reader is looking at last. So when a customer is looking for mini vans and they return to your site next week to see mini vans they will see minivans. Catalog inventories can be generated dynamically.

"The GW Catalog interfaced in moments to our dealership software and is the best car dealership catalog I have seen so far." -- Todd Ratson System Administrator [www.importautogroup.com](http://www.importautogroup.com/modules.php?op=modload&name=NS-GeeWhiz&file=index)

The Weldon Group : Helping the Consumer see Auto Dealers as Leaders of their Communities Again.
