

InventHelp Inventor Develops Pickup-Truck Accessory for Easy Loading (PIT-239)

A leading invention submission firm, InventHelp is submitting the EZ PULL WINCH BRACKET to companies for their review.

PITTSBURGH, PA ([PRWEB](#)) September 13, 2016 -- "Pickup trucks are excellent for hauling around heavy equipment and other cargo, but just getting the load into the bed in the first place is a big chore in and of itself," said an inventor from Transfer, Pa. "To assist with loading the bed safely and easily, I developed this idea."

He developed the EZ PULL WINCH BRACKET to offer a better way to load heavy equipment and cargo into a pickup truck bed. The device reduces the physical stress and strain normally involved in loading the bed. This avoids muscle strains and injuries, which is designed to enhance personal safety. All of this provides added peace of mind. Furthermore, the invention is adaptable for use with most new or existing pickup trucks.

The original design was submitted to the Pittsburgh office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-PIT-239, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
