

National Car Rental Combats Bounced Checks

NSF Check Retrieval to Manage the Recovery of National Car Rental's Bad Checks.

([PRWEB](#)) July 16, 2003 -- NSF Check Retrieval (www.nsfchecksretrieval.com), one of the nation's leading providers of check recovery services, has announced that National Car Rental will begin using NSF Check Retrieval's free check recovery service to collect on bounced and bad checks.

"We're proud to be able to work with National Car Rental in designing a check recovery program customized to their needs which will be free of charge and offer a significantly higher collections rate than many other fee-based alternatives," said Edward Buckwald, CEO of NSF Check Retrieval.

NSF Check Retrieval handles check collections through a process called "electronic re-presentment," which allows NSF to debit each bad check as well as a state-defined service charge directly from the bad check writer's bank account. This method is more efficient than other types of collections and often yields a significantly higher recovery rate. Upon successful recovery the customer receives 100% of the check principle.

About NSF Check Retrieval

NSF Check Retrieval uses cutting edge Federal Reserve sanctioned technology to dramatically enhance and simplify the returned check recovery process for merchants across the nation - at absolutely no cost to them.
