PixEarth Announces AutoSync Software Enhancement

PixEarth Corporation, a leading software provider to the automobile advertising industry, today announced that bar code scanning capabilities have been added to its popular AutoSync software.

Fort Collins, CO (PRWEB) January 9, 2004 --PixEarth Corporation, a leading provider of powerful photo documentation software for the automobile advertising and sales industry, today announced it has added bar code scanning capabilities to it popular AutoSync software.

Keith Croteau, Chief Technology Officer, PixEarth said, Â□We are continually looking for ways to improve the performance of AutoSync by listening to our clients. They have indicated that bar code scanning for the VIN is a priority. Now we can say weÂ□ve integrated the solution into the industryÂ□s best and most cost effective auto documentation and advertising software Â□ AutoSync.Â□
