*Dependable Limos of Palm Beach County Named 1st Runner-up
for Small Limo Operator of the Year for the United States
by Limo Digest Magazine.*

Lake Worth, Florida ([PRWEB](#)) January 13, 2004 --Dependable Limos, a women owned and operated full service limousine company was named the first runner up for the Small Operator of the Year at the Limo Digest Magazine awards held annually in Atlantic City NJ.

In February 2002, Teri Davis, the owner of Dependable Limos, took her seven years of experience in the livery industry and with a cell phone and a used Town Car and founded Dependable Limos. She gambled on her reputation for being dead-on reliable and backed it up with the strongest guarantee in the business, which her competitors STILL cannot match--if your car is late, your ride is free!

Nine months later, she added a second Town Car to keep up with the demand from her happy clients along with a Minivan for people with children. Stretch Limousines followed in 2003 and 20 months after opening her business, she has gone from being a start-up one girl show to owning the second best small limousine company in the United States! The vast majority of limousine services in the U.S. are less than five cars, making the small operator category the most competitive one in the industry!

In a heavily male-dominated industry, Dependable Limos has courted women travelers, as they are reluctant to enter a car after dark with a male driver they don't know in an area they are not familiar with. The excellent service provided by Dependable Limos coupled with the comfort factor of having female drivers has made the company a favorite with women business travelers and tourists alike! Teri's attention to client safety, comfort and satisfaction translates to consistent 5-star ratings at Limos.com and a 70% repeat and referral business from very happy and loyal clients!
