

## First BioDiesel Station Opens in Connecticut

### *World Energy Teams-Up with Santa Energy to Open Connecticut's first Biodiesel Station*

New Haven, CT ([PRWEB](#)) January 14, 2004 --World Energy Alternatives, LLC, the leading supplier of biodiesel, biodiesel blends and other biofuels today announced the opening of Connecticut's first commercial biodiesel fueling station.

Buckley Energy will be supplying World Energy's Biodiesel to Santa Energy, Inc., located at 670 Ella T. Grasso Blvd., New Haven, CT. Santa Fleet Services will be offering to commercial customers B20, or a 20% blend of biodiesel and 80% petroleum diesel. Biodiesel is a clean burning, renewable fuel that is made from renewable sources such as soybean oil, grown in the United States.

In addition to its renewable content, biodiesel also significantly reduces emissions. The Environmental Protection Agency (EPA) recently released a comprehensive technical report of biodiesel emissions data that shows the exhaust emissions of particulate matter from pure biodiesel are about 47 percent lower than overall particulate matter emissions from diesel. Breathing particulate has been shown to be a human health hazard. Biodiesel emissions also reduce by 80 to 90 percent potential cancer causing compounds called Polycyclic Aromatic Hydrocarbons (PAH) and nitrated PAH. Biodiesel also reduces emissions of total unburned hydrocarbons, a contributing factor to smog and ozone, by about 68 percent. Biodiesel has more than just emissions benefits it has higher lubricity than standard petroleum diesel. This can help engines run longer, cleaner, and smoother.

The biodiesel market has doubled in size year after year and this year is expected to top 20 million gallons of B100 sold. Today, there are over 150 retail stations nation-wide with more becoming operational every month. "Key World Energy Distributors like Santa Energy will continue to be an integral part of helping World Energy drive the biodiesel market forward," said Gene Gebolys, president of World Energy.

#### About World Energy Alternatives

World Energy Alternatives, LLC is the nation's leading supplier of biodiesel, biodiesel blends and other biofuels. With offices in California, Texas and Massachusetts, along with production capabilities throughout the country, World Energy is a driving force behind America's commercialization of new bioenergy.
