

Three Easy Steps to Control RV Mold and Mildew

InstaGone Consumer Products, the maker of professional strength stain removers and cleaning products is offering free tips on how to control mold and mildew in RVs.

Wall, New Jersey ([PRWEB](#)) January 7, 2004 --Mold and mildew are common and persistent problems for homeowners throughout the country, but RV enthusiasts are faced with specific mold and mildew issues of their own that must be addressed.

Peter Chicarielli, president of InstaGone Consumer Products is an RV enthusiast who knows the unique mold and mildew challenges that RV owners face. "A major cause of mold and mildew is long term RV storage. Keeping a trailer or camper locked down or under a tarp, especially in a warm humid climate creates a very efficient mold and mildew incubator."

Even an RV that is used year round and never put into storage is not immune from mold and mildew. Chicarielli explains this is because full time RVers tend to follow the sun to warmer climates. "This pursuit of the endless summer encourages endless mold and mildew growth - especially for those touring Florida and Texas."

Whatever the cause, Chicarielli recommends a simple, three-step mold control plan for RV owners:

- 1) Inspect " Look for early signs of mold and mildew in places such as shower areas, underneath sinks and stoves, gel coat exteriors, storage compartments, caulking and molding (around windows, doors and sunroofs) ceilings, ceiling vents, vinyl awnings, water and sewerage hook-ups, and refrigerators, dishwashers and washing machines that have not been used for extended periods.
- 2) Repair " Fix plumbing leaks, drain clogs, roof leaks, poor bathroom ventilation that can encourage mold growth or damaged caulking and molding.
- 3) Remove " Treat emerging mold thoroughly with a powerful cleaning product such as InstaGone Multi-Purpose Stain Remover.

If you suffer from allergies, Chicarielli recommends the use of rubber gloves, non-vented goggles and a chemical respirator to limit your exposure, especially when cleaning interior RV areas affected by mold. "Any health risks normally associated with mold exposure in a traditional home may be intensified due to the close quarters of an RV. If you have been experiencing symptoms such as headaches and difficulty breathing, it may be best to avoid the health risk and call your RV Dealer or in extreme cases, a certified mold remediation specialist."

About InstaGone Multi-Purpose Stain Remover

InstaGone Industrial Multi-Purpose Stain Remover is a laboratory tested, consumer proven solution for preventing mold and mildew formation and eliminating early stage mold growth on surfaces such as acoustical ceiling tiles, concrete, brick, tile, sheet rock and spray textured "popcorn" ceilings. InstaGone Multi-Purpose Stain Remover is superior to using household chlorine bleach for mold and mildew removal for several

reasons:

- 1) InstaGone's formula is far less corrosive than chlorine bleach.
- 2) InstaGone comes in pre-measured, concentrated packets that are far less bulky than gallon jugs of bleach.
- 3) InstaGone's pre-measured packets are mixed with water at the time of use, resulting in a fresher, more potent cleaning solution
- 4 In many cases, InstaGone can prohibit additional mold growth for several months.

About InstaGone Consumer Products:

InstaGone Consumer Products is a pioneer in the development of professional strength cleaning products that come in highly-concentrated, pre-measured packets. This product packaging philosophy lowers shipping costs, ensures product freshness, saves storage space and perhaps most importantly, reduces plastic waste. Recently, the company expanded its product line to the first RV Laundry Kit. For more information, call 888-425-0125 or visit www.instagoneproducts.com
