

Stop OVER paying your mechanic!

TrustMyMechanic.com is announcing a newly-designed Web site offering auto repair advice readers can really use. Hosted by popular author Austin Davis, this site provides interesting and informative articles, insider tricks and money saving secrets revealed by the Honest Mechanic.

([PRWEB](#)) August 4, 2003 -- Austin Davis, a freelance writer for the auto repair industry, presents a newly-designed Website <http://www.trustmymechanic.com> inspired by his acclaimed consumer advocate articles.

Austin, author of the popular e-book *What Your Mechanic Doesn't Want You to Know*, is known throughout the auto repair industry as the "Honest Mechanic." His work as a feature columnist for several venues and his popular newsletters have inspired the new Website design, which includes a forum for readers to ask for advice and help with their auto repair problems. Another popular feature of the new TrustMyMechanic.com site is the parts gallery, where consumers can get information about the parts and recommend repairs that they are researching.

Austin doesn't do "how to" material, but concentrates on consumer advocate issues and maintenance/repair advice. Many of his articles also deal with issues like avoiding common auto repair scams, what NOT to say to a mechanic, and dealing with insurance companies and body shops with automobile claims.

In addition to his popular written work, Austin personally answers numerous e-mail questions from readers with auto-related problems. He enjoys not only sharing his years of experience, but also building a rapport with readers. For more information about Austin's work, or to inquire about adding a weekly column of this nature to your publication, contact Austin at austin@trustmymechanic.com.

Please take a moment to review some of the material on the new Web site, <http://www.trustmymechanic.com>
