

Oklahoma City Accident Lawyer at the Byrd Law Firm Says to Watch for Icy Road Conditions

Oklahoma City Accident Lawyer advises drivers to be watchful during the winter

Oklahoma City, Oklahoma ([PRWEB](#)) January 03, 2012 -- Winter is nearly here and [Oklahoma City Accident Lawyer](#) Jason Byrd wants to tell motorists everywhere that they need to start driving more defensively. This is due to the fact that icy road conditions are not at all uncommon during the winter season.

“You’d be surprised how many unsuspecting drivers will hit a patch of ice, especially on an overpass, and the next thing they know they are spinning out of control,” Jason Byrd explains.

He goes on to say that the best offense is a best defense. In other words, “Simply keep a watchful eye. The fact of the matter is—you can never really be too careful.”

Beyond driving defensively, Byrd says if people do find themselves sliding on ice, they should make sure not to hit the brakes.

“One of the key mistakes is breaking when in a slide. This will cause a motorist to lose control of the car. And before you know it, you’ll be calling the Byrd Law Firm for an Oklahoma City Accident Lawyer!”
