

InventHelp Client Patents “Aneiros” - Invention Could Help to Protect License Plates

Pittsburgh-based InventHelp® attempts to submit clients' inventions to companies for review.

Pittsburgh, PA ([PRWEB](#)) January 06, 2012 -- [InventHelp®, America's largest invention submission company](#), announces that one of its clients, an inventor from Florida, has designed a transparent case that could prevent theft of a license plate. This invention is patented.

“Aneiros” case could be locked and unlocked by the vehicle owner only via a key or remote control. The design could protect a license plate and tags from being stolen, which provides user with peace of mind. The automotive accessory would feature a colored border that could display personal messages, logos or other designs.

Aneiros would consist of a rectangular, metal and transparent-plastic, hinged case sized to house a standard license plate. The accessory would feature a transparent window (would include lights) that would display the license plate and tag information. The window would be offset toward either side or toward the bottom of its border. A solid metal border would frame the display window and could be produced in various colors. The border could also display personalized messages, logos (company or team, etc.), or other designs. A user would insert the license plate into the cover then snap the cover shut. The cover would attach to the rear of the vehicle via screws. An optional key lock would be located on either side or the top center of the border. The case would also feature an electronic mechanism for remote-control locking and unlocking. Aneiros could be built into new vehicles or installed on existing ones.

[InventHelp®](#) is attempting to submit the invention to companies for review. If substantial interest is expressed, the company will attempt to negotiate for a sale or royalties for the inventor. For more information, telephone Dept. 08-MIM-3307at (800) 851-6030.
