

InventHelp Inventor Develops Easy-To-Use Mileage Calculator (JMC-1302)

A leading inventor service company, InventHelp is attempting to submit this idea, the Mileage Pen, to companies for their review.

Pittsburgh, PA ([PRWEB](#)) January 03, 2014 -- "As a professional truck driver, I saw a need for a device that would help me calculate the mileage to my destination," said an inventor from Elkhart, Texas. "Not only would this save time, it also would reduce my need to refuel as often."

He developed the Mileage Pen to provide a convenient way to measure distances on printed maps. The device enables a traveler to select the fastest possible route to the final destination. The unit avoids unnecessary guesswork and confusion. It also helps to save fuel by reducing overall travel time. The invention eliminates the need to rely on GPS. In addition, it is ideal for travelers and vacationers, and it features a convenient hand-held design.

The original design was submitted to the Telemarketing office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 12-JMC-1302, [InventHelp](#), 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
