

InventHelp Inventor Designs an Alternative Way to Play with Toy Vehicles (SDB-590)

Pittsburgh-based InventHelp is attempting to submit the R.T. Adventure to applicable companies in the hopes of a good faith review.

Pittsburgh, PA ([PRWEB](#)) January 03, 2014 -- An inventor from Escondido, Calif., has designed a dynamic addition to the toy world. "While on a Hawaii vacation, I observed children playing on the beach, and I thought that there needed to be an alternative form of recreation for them," he said.

He then created a prototype of the R.T. ADVENTURE, which serves as a more dynamic way to play with toy vehicles. It provides hours of fun and pretend, and it can be used in any indoor/outdoor location. Versatile and easy to use/clean, the toy is ideal for male and female children of various ages, at beaches, parties and carnivals.

The original design was submitted to the [San Diego office of InventHelp](#). It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 12-SDB-590, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
