

## **Used 351 Windsor Engine Now for Sale to U.S. Buyers Through Ford Inventory at Preowned Engines Company**

*Used 351 Windsor engine is now for sale to buyers in the U.S. through the Ford inventory promoted at the [PreownedEngines.com](http://PreownedEngines.com) company. These V8 engines can be located on the company homepage.*

Phoenix, AZ ([PRWEB](http://PRWEB)) January 03, 2014 -- The vintage engines that have been produced by automakers like Ford and Chevy have made it possible for vehicle restoration companies to restore classic cars. The Preowned Engines company is now announcing its inventory of used 351 Windsor engine inventory for sale to buyers at <http://preownedengines.com>.

These 351 classic edition Ford Motor Company engines are expected to create new buying resources for restoration companies, vehicle owners and service businesses that purchase these units. These large block V8 engines are currently marketed in the inventory posted online for easy research for engine shoppers.

The availability of the 351 engine in the U.S. market has decreased in recent years as Ford has ceased production of this engine block. Secondary market sellers and other sources are now primary ways that buyers access inventory for sale for these builds. The units that are now listed online are shippable to domestic buyers.

"The Windsor builds that we're now offering are included in the expanded vintage V8 inventory that features 302, 255 and other larger engine types for buyers," said a source from the [PreownedEngines.com](http://PreownedEngines.com) company.

The arrival of the used 351 Ford motors is one shift in a different direction at the Preowned Engines company. While a large percentage of engine retailers focus on new builds, the vintage and classic industry has a smaller market of buyers with fewer resources to buy authentic motors.

"One option that we're including with the V8 inventory for sale is a warranty offered for a duration of 24 months after purchase and shipment," included the source.

The modified research system for replacement engines included at the [PreownedEngines.com](http://PreownedEngines.com) company website can be utilized for locating the current sale pricing for the used ford 351 Windsor motors or other V8 builds that are now for sale in the U.S.

This system offers exact shipping costs information as well as accurate inventory levels for each motor. Users are free to use this system online or can call the toll-free company phone number for additional data not supplied through the research tool.

### About [PreownedEngines.com](http://PreownedEngines.com)

The [PreownedEngines.com](http://PreownedEngines.com) company supports the North American automotive industry with low prices and a large available inventory of used condition engines. Consumers who are using the company created resources online to find replacement vehicle engines receive instant price quotes and other incentives.
