

"That Clunk": The App That Will Diagnose Your Vehicle for You; Here is Your Chance to Be a Part of This Revolutionary Method of Car Repair

A new app is on its way to put the power back into the hands of the consumer.

Bowie, Maryland ([PRWEB](#)) January 06, 2014 -- We have all been there where you are driving around and all of a sudden you hear a noise. Something that you never heard your car make before. The common chain of events following is panic. What is that noise? How much will it cost to fix? How important is it? Who can I trust? Should I pull over and call a tow truck? Then you start talking with friends, family, and folks around the office about it. Eventually you take it to a auto mechanic and they tell you whatever they can shake out of. Whatever they say, you have no way of contesting or arguing. Well that no longer needs to be the case. "That Clunk?" will take a recording of the noise your car is making and tell you what is wrong. Then it will tell you what the problem is. It will also provide you with options such as the nearest auto body repair shop, tools tips and instructional videos for if you want to try and fix it yourself, and estimates of what it might cost to fix. This app is designed to ease people minds and put the power back into the hands of the consumer. Almost everyone drives, very few know a lot about how their car works. Now you don't have to be a auto mechanic to know about your car, you just need to be able to tap a screen a few times. With your help this app can become reality. just go to <https://sellanapp.com/idea/that-clunk/pitch> and pledge. Once you pledge you open yourself up to rewards and any future revenue that this app will make. We need some money to get it off the ground and get it developed. Be a part of the future today!
