

## **InventHelp® Client Patents “Apollo Dino Series Panic Air Pad” – Invention Could Help Authorities Find Automobiles Quickly in an Accident**

*InventHelp, a leading inventor service company, is attempting to submit this idea, the Apollo Dino Series Panic Air Pad, to companies for their review.*

PITTSBURGH, PA ([PRWEB](#)) December 30, 2014 -- [InventHelp](#), a leading inventor service company, announces that one of its clients, an inventor from Louisiana, has designed a vehicle system that notifies authorities of passengers who are trapped in their car during an accident, or if they are experiencing a medical crisis. This invention is patented.

The “Apollo Dino Series Panic Air Pad” could immediately alert authorities when passengers are in an accident or are experiencing some other type of danger. Designed to save lives, the inventor claims that it also gives vehicle occupants added peace of mind. The invention could also be adapted for use in elevators, bank vaults, aircraft, underground facilities, and confined spaces that could malfunction and trap someone.

The emergency system would include iridescent blue and yellow trim, a small speaker, interior fans, solar grids, blue lights, microchips, sensors, thermostats, iridescent pads and bubble levels. During a collision or dangerous incident, the fans and blue lights would be activated, and an emergency message would be broadcast to authorities, pinpointing the car’s location. The exhaust fans help to vent smoke and carbon monoxide from the vehicle. The thermostat would activate the heater or air conditioner if needed, providing clean air for up to three hours. The system is deactivated only when the doors are opened. The combination of lights, trim and glow-in-the-dark pads would help authorities on land or in the air to find the damaged vehicle. A trunk-mounted fan could also be used to supply air for a kidnapping victim who is forced into the trunk.

“This faith-inspired invention was conceived step-by-step,” said the inventor. “I feel strongly that it can save the lives of humans and pets traveling by vehicle. In fact, anyone who is caught in unforeseen conditions can be helped by my idea.”

[InventHelp](#) is attempting to submit the invention to companies for review. If substantial interest is expressed, the company will attempt to negotiate for a sale or royalties for the inventor. For more information, telephone Dept. 09-GDA-3933 at (800) 851-6030.
