

## **InventHelp Inventor Designs Transport Aid for Parents/Guardians of Infants (CCP-1149)**

*A leading invention firm, InventHelp is submitting the PRECIOUS CARGO CAR SEAT to companies for their review.*

PITTSBURGH, PA ([PRWEB](#)) October 14, 2016 -- While bringing up two young boys, motherhood has called an inventor from Milton, Wis., to try to improve others' lives. "Several of my friends also are moms with little children, and we all share the same complaint: carrying our babies in their detached car seats causes back and shoulder pain," she said. "I'm just an average mom with a big dream of helping other moms carry their precious cargo without struggle and hassle."

To meet this need, she created the ergonomic and easy-to-use the patent-pending PRECIOUS CARGO CAR SEAT, which enables a parent or guardian to carry an infant to and from a vehicle in a safe, easier, more convenient manner. This prevents back and shoulder strain and pain, as well as avoids struggle, awkwardness and danger. It also eliminates the need to lug it around via a handle, transfer it to a wheeled frame or transport a separate stroller or car seat. It also meets all government safety standards. In addition, it's convenient for airports and other types of trips in which a baby must be transported to and from a vehicle, such as shopping. Producing in many design variations, it's ideal for parents, grandparents and other guardians of infants.

The original design was submitted to the Chicago office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-CCP-1149, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
