German Automotive Supplier Deploying Cactus Technologies 210 Series 32GB 2.5” PATA SSD for their OEM Infotainment System

Cactus Technologies, Ltd. is supplying its 210 Series 32GB 2.5” PATA SSD to a major automotive company in Germany for use in their Infotainment System.

Winter Springs, FL (PRWEB) January 06, 2015 -- Cactus Technologies, Ltd. is supplying its 210 Series 32GB 2.5” PATA SSD to a major automotive company in Germany for use in their Infotainment System.

This Infotainment system is more than a traditional radio navigation system. It connects high-precision navigation with a variety of current multimedia functions, offering optimum sound and image quality and foolproof operation. In addition to outstanding radio reception, the infotainment system plays DVDs and all popular music formats.

The application-oriented Human Machine Interface makes the radio navigation system highly user-friendly and flexible. The intuitive touch-screen navigation can be flexibly adapted.

The Cactus 210 Series PATA SSD is based on MLC NAND technology and has proven extremely reliable, with over 100,000 units shipped into in this German Infotainment system.

Sai-Ying Ng, President of Cactus Technologies Ltd, commented, “We are proud to ship our SSD that meets and exceeds the quality requirement of this German automotive OEM company for their infotainment system. The innovative radio navigation system has a proven track record in the field and we look forward to expand our Automotive product offering.”

Joseph Chang, Vice President of Engineering of Cactus Technologies Ltd., said, "The Cactus 210 Series 32GB 2.5” PATA SSD continues to meet the challenge of the demanding automotive environment for this in-dash application. We will continue to develop our SSD for automotive customers worldwide in the future.”

Cactus Technologies supports OEMs Worldwide to meet their objectives with the highest reliability Industrial Flash Storage Products using industry leading controller technology and highly reliable flash memory. Our flash storage products enable OEM’s systems to operate without a fault in the harshest and most mission critical environments.

1 MByte = 1 million bytes; 1 GByte = 1 billion bytes; 1Gbit = 1 billion bits.
