

Full Coverage Auto Insurance Prices for 2015 Now Quoted at Insurer Portal Online

Full coverage auto insurance rates for 2015 can now be priced and quoted online using the upgraded portal at the Quotes Pros website at <http://quotespros.com>.

Seattle, WA ([PRWEB](#)) January 06, 2015 -- Motorists across the country who require more automobile coverage than what a standard liability plan offers can now use the Quotes Pros portal to find new policy pricing. New full coverage auto insurance prices for 2015 can now be reviewed when using the open portal at <http://quotespros.com/auto-insurance.html>.

The New Year rates are being supplied direct from companies in the U.S. that have agreed to present rates in the Quotes Pros search portal. The full auto insurance coverage plans that companies are promoting this year are valid in most states and a zip code will be required from car owners prior to system access.

"What our system provides is an easier way to search many companies at the same time to find the lowest rates marketed by leading agencies," said one Quotes Pros rep.

The insurer tools that are now supplied through the Quotes Pros developed portal are free of charge to use. One advantage that car owners automatically receive when entering the web portal is the direct access to a variety of coverage options. Owners of vehicles can freely search for liability, broad form, collector and bonded policies using only their zip code.

"We first built our portal a few years ago and we're constantly showcasing different insurers that could help motorists find cheaper coverage," said the rep.

The Quotes Pros company has improved its web portal in other ways this year by including more refined searches for similar types of coverage. While some car insurance companies offer life insurance as an upgrade, the portal now provides third party companies specializing in term or whole life insurance plans at <http://quotespros.com/life-insurance.html>.

About QuotesPros.com

The QuotesPros.com company supplies adults with an easy platform for locating price data and policy information from U.S insurers on the web.
