

InventHelp Inventor Designs Portable Traction Device for Vehicles (MTN-2352)

InventHelp, founded in 1984 in Pittsburgh, is submitting the SLIP GRIP to companies in the hopes of a good faith review.

PITTSBURGH, PA ([PRWEB](#)) November 25, 2015 -- Do you wish there was a fast and easy way for vehicles to get out of a slippery rut? An inventor, from Bronx, N.Y., thought there needed to be a better way, so he invented the SLIP GRIP.

The SLIP GRIP offers instant tire traction in slippery conditions. In doing so, it eliminates the need to call for an expensive emergency roadside service truck. As a result, it enhances safety and traction and it helps to minimize delays and possible injuries. The invention features a portable and reusable design that is convenient and easy to use so it is ideal for vehicle owners. Additionally, the SLIP GRIP is producible in design variations.

The inventor described his inspiration for the invention. "I came up with this idea while working as a mechanic. I saw too many vehicles get stuck in the snow and I thought there had to be a better way to provide traction in these conditions."

The original design was submitted to the Manhattan office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 14-MTN-2352, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
