

InventHelp Client's Device Optimizes Safety Around Roadside Vehicles (MTN-2399)

InventHelp, a Pittsburgh-based invention company, is submitting the E CARS to companies for their consideration.

PITTSBURGH, PA ([PRWEB](#)) November 27, 2015 -- An inventor from Brooklyn, N.Y., wanted to maximize the effectiveness of safety signals around stopped or distressed vehicles, so he designed the E CARS.

This device optimizes safety around a vehicle that is stopped or in distress by the side of the road. It alerts other drivers long before they reach the site. As a result, it helps prevent accidents, injuries and fatalities, which promotes peace of mind. Easy to use and suitable for all drivers, the device can be produced in design variations.

The original design was submitted to the Manhattan office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 14-MTN-2399, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
