

Inventor and InventHelp Client Develops Improved Snow-Removal Device (MTN-2418)

A leading invention company, InventHelp is working to submit THE MELTER to appropriate companies for their review.

PITTSBURGH, PA ([PRWEB](#)) November 27, 2015 -- "I was tired of all the hassle involved with clearing ice, snow and frost off my car before driving anywhere in the wintertime," said an inventor from Mamaroneck, N.Y. "I wanted a faster, easier, more efficient way to clear off all the accumulation, which is why I invented this."

He developed THE MELTER to provide a quick and easy way to clear ice, snow and frost off the exterior of a vehicle. It is designed to be more efficient than using a broom or ice scraper. The device saves time and effort when readying the vehicle for winter travel. It also eliminates hassles and frustrations. Additionally, the easy-to-use invention features a compact, easily portable design that stores in the trunk.

The original design was submitted to the Manhattan office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 14-MTN-2418, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
