

InventHelp Inventors Develop Effective Vehicle Security System (ROH-111)

InventHelp, a Pittsburgh-based inventor service firm, is submitting the ADDED CAR SECURITY SYSTEM to companies for their review.

PITTSBURGH, PA ([PRWEB](#)) December 01, 2015 -- InventHelp, a Pittsburgh-based inventor service firm, is submitting the ADDED CAR SECURITY SYSTEM to companies for their review.

"We thought modern technology could be used to capture criminals who break into automobiles," said one of two inventors from Rochester, N.Y. "An alarm system alone is not sufficient to deter crime and capture criminals, which is why we developed this more effective security feature."

They developed the ADDED CAR SECURITY SYSTEM to help police apprehend criminals who break into vehicles. This enhances vehicle security and also is designed to deter would-be criminals. The invention may assist with lowering insurance premiums. It provides added peace of mind when leaving vehicle unattended. In addition, the system is adaptable for use with both new and existing vehicles.

The original design was submitted to the Rochester office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 14-ROH-111, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
