

InventHelp Inventor Develops Emergency-Vehicle Alert System (SUU-138)

InventHelp, a Pittsburgh-based inventor service firm, is submitting the LINA GUS SENSOR to companies for their review.

PITTSBURGH, PA ([PRWEB](#)) December 02, 2015 -- "Too many times, motorists hear the sirens of an emergency vehicle, but they have no idea from which direction it is coming," said an inventor from St. Louis, Mo. "In order to avoid confusion and help emergency vehicles reach their destinations quickly and safely, I came up with this idea."

He developed the LINA GUS SENSOR to alert motorists to an approaching emergency vehicle. The system provides ample time for motorists to clear a path for the emergency vehicle. It helps emergency vehicles reach their destinations more quickly. Also, the invention is designed to enhance roadway safety by helping to reduce the incidence of collisions. Additionally, it improves response time.

The original design was submitted to the St. Louis office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 14-SUU-138, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
