

InventHelp Inventors Design SAFETY TEXT (SUU-147)

InventHelp, a Pittsburgh-based invention firm, is submitting the SAFETY TEXT to companies for their consideration.

PITTSBURGH, PA ([PRWEB](#)) December 03, 2015 -- Two inventors, from Richland, Mo., thought there needed to be a more effective way to prohibit drivers from texting while driving, so they invented the SAFETY TEXT.

The SAFETY TEXT ensures that texting capabilities are disabled while operating a vehicle. In doing so, it prevents texting related distractions. As a result, it increases safety and it provides added peace of mind and a security system. The invention features a practical design that is convenient and easy to use so it is ideal for vehicle owners and fleet owners. Additionally, the SAFETY TEXT is producible in design variations.

The inventors described the invention design. “Our design enhances safety by cutting down on texting related accidents.”

The original design was submitted to the St. Louis office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 14-SUU-147, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
