

InventHelp Inventor Develops Vehicle Accessory for Winter-Weather Travel (SUU-151)

InventHelp, founded in 1984 in Pittsburgh, is submitting the MIRROR GLOVE to applicable companies for their review.

PITTSBURGH, PA ([PRWEB](#)) December 03, 2015 -- "I do not like having to scrape the external mirrors on my car before traveling in winter-weather conditions," said an inventor from Belleville, Ill. "I thought that there had to be a better way to keep my external mirrors free of the accumulation of snow, ice and frost."

He developed the MIRROR GLOVE to keep external mirrors clear of the accumulation of ice, snow and frost. The accessory eliminates the need to scrape the mirrors before traveling in winter-weather conditions. This saves time and effort when readying the vehicle for use. The unit ensures that the mirrors are free of anything obstructing the driver's view. This makes it easier to change lanes, take turns and otherwise direct the vehicle safely. In addition, the device is adaptable for use with any vehicle.

The original design was submitted to the St. Louis office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 14-SUU-151, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
