

NEW MILLENNIUM WINDSHIELD CLEANING SYSTEM Invented by InventHelp Clients (BGF-940)

A Pittsburgh-based invention company, InventHelp is submitting the NEW MILLENNIUM WINDSHIELD CLEANING SYSTEM to companies for review.

PITTSBURGH, PA ([PRWEB](#)) December 06, 2015 -- Two inventors, from Clinton Township, Mich., thought there needed to be a better way to clear the front windshield when driving in rain, sleet and snow, so they invented the NEW MILLENNIUM WINDSHIELD CLEANING SYSTEM.

The NEW MILLENNIUM WINDSHIELD CLEANING SYSTEM provides an effective way to remove moisture from a windshield. In doing so, it offers an alternative to traditional windshield wipers and it ensures that a windshield remains dry and clear. As a result, it helps to enhance visibility and safety. The invention features a practical design that is convenient and easy to use so it is ideal for vehicle owners. Additionally, the NEW MILLENNIUM WINDSHIELD CLEANING SYSTEM is producible in design variations.

The inventors described the invention design. “Our design prevents moisture from accumulating and obstructing a driver’s view.”

The original design was submitted to the Bingham Farms office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 14-BGF-940, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
