

## **Vehicle-Safety System for Children Invented by InventHelp Client (BRK-2100)**

*A Pittsburgh-based inventor service company, InventHelp is submitting the BABY BUCKLE to companies for their consideration.*

PITTSBURGH, PA ([PRWEB](#)) December 07, 2015 -- After watching news reports about babies dying when left behind in hot cars, an inventor from Bessemer, Ala., decided that these tragedies have to stop.

The patent-pending BABY BUCKLE prevents a child from behind left behind in a vehicle. This reduces deaths caused by overheating, which avoids broken families and lawsuits. Overall it promotes peace of mind. Easy to use and compatible with all vehicles, it also can be produced in a version for new vehicles.

The original design was submitted to the Birmingham office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 14-BRK-2100, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
