

New at Genuine Hotrod Hardware by Summit Racing Equipment: STP Collectibles, Drag Race Christmas Tree, and Turbospoke Bicycle Exhaust

There is plenty of time to get holiday gifts for performance enthusiasts from Summit Racing's Genuine Hotrod Hardware. Here are some of the newest collectibles, decor, and apparel now available.

Tallmadge, OH ([PRWEB](#)) December 08, 2015 -- There is plenty of time to get holiday gifts for performance enthusiasts from Summit Racing's Genuine Hotrod Hardware. Here are some of the newest collectibles, decor, and apparel now available.

[STP Collectibles](#)

For over half of a century, the Scientifically Treated Petroleum (STP) logo has been seen on race cars, track signs, and toolbox stickers across the country. Genuine Hotrod Hardware carries STP collectibles including:

- The STP Logo Hat looks like it could've been plucked out of a garage from the 1960s. It features the unmistakable STP logo as a real, sewn-on patch
- Ranging from a basic STP logo to vintage-style advertisements, STP Logo Signs are the perfect way to dress up a rec room, garage, or office. They feature vibrant, printed graphics on durable steel, and come ready to hang
- A 1:18 Scale Die-Cast Richard Petty 1972 Plymouth Road Runner commemorates “the King’s” overall points victory in NASCAR’s 1972 Winston Cup Series. Authentic right down to its Goodyear race slicks, this highly detailed model features realistic touches like window netting, sponsor decals, and (of course) a race-prepped 426 Hemi under the hood

[Drag Race Christmas Tree](#)

Genuine Hotrod Hardware offers a realistic reproduction Christmas Tree that can be mounted on the wall next to holiday decorations or that favorite lounge chair. The Christmas Tree has authentic-looking stage/pre-stage lights, plus animated timing lights that flash down in sequence. The Christmas Tree also features LED lights that illuminate “Final Round” right down the center column.

[Turbospoke Bicycle Exhaust System](#)

Instead of using baseball cards attached with clothespins, the Turbospoke has three interchangeable Motocards that deliver a distinct motorcycle sound—a buzzing dirtbike, low rumbling cruiser, or standard streetbike. Better yet, the realistic-looking Turbospoke “muffler” actually amplifies the sound; the faster the bike is pedaled, the louder it gets. The Turbospoke Bicycle Exhaust System fits practically every bicycle with a 16 inch or larger rear wheel and clamps onto the frame in minutes using the included tools.
