

## **InventHelp Inventor Develops Motorist-Friendly Cell Phone (CBA-2831)**

*InventHelp, founded in Pittsburgh, Pa., is submitting the LATER GATOR to companies for their consideration.*

PITTSBURGH, PA ([PRWEB](#)) December 08, 2015 -- "Too many people have gotten in accidents because they were distracted by their cell phones while driving," said an inventor from Bowman, S.C. "I know because this has happened to me as well. In order to make the roads safer, I devised a better cell phone."

He developed the patent-pending LATER GATOR to prevent drivers from being distracted by incoming calls and texts. The phone ensures that individuals trying to reach the driver do not feel ignored or unimportant. It keeps the driver from feeling guilty for not responding immediately. The device enables the driver to concentrate solely on driving. It is designed to enhance roadway safety by reducing the incidence of accidents. All of this offers added peace of mind.

The original design was submitted to the Columbia office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 14-CBA-2831, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
