

InventHelp Inventor Designs DETAIL BRUSH (CLM-206)

InventHelp, founded in 1984, is submitting the DETAIL BRUSH to companies in the hopes of a good faith review.

PITTSBURGH, PA ([PRWEB](#)) December 09, 2015 -- An inventor, from Columbus, Ohio, thought there needed to be a better way to remove dirt, grime and brake dust when cleaning and detailing vehicle wheels, so he invented the DETAIL BRUSH.

The DETAIL BRUSH provides a more effective way to scrub and clean a vehicle's wheels. In doing so, it enables an individual to clean the hard-to-reach areas of a wheel. It also eliminates the need to remove a wheel for complete cleaning and it saves time and effort. The invention features a lightweight design that is convenient and easy to use so it is ideal for automotive enthusiasts. Additionally, the DETAIL BRUSH is producible in design variations.

The inventor described the invention design. "My design ensures that a vehicle's wheels look clean and new."

The original design was submitted to the Columbus office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 14-CLM-206, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
