

RV Camper Slideout and Awning Pole Safety Aid Invented by InventHelp Clients (FED-1549)

InventHelp, based in Pennsylvania, is submitting the NOGGIN SAVER to appropriate companies for their review.

PITTSBURGH, PA ([PRWEB](#)) December 11, 2015 -- After hitting their heads on the slideouts and awning poles of their RV, two inventors from Camano Island, Washington, decided that there should be a way to prevent such injuries from occurring.

They then created a prototype for the NOGGIN SAVER, which is a safety device to protect people from injury associated with banging and bumping against the sharp sides and corners of slideouts and awning poles. This device promotes peace of mind so owners can enjoy their RV's without worry of injury. The patent pending invention is easy to use and store, and it can be produced in several design variations.

The original design was submitted to the Seattle office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 14-FED-1549, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
