

MotoTech Solutions Launches Flagship Product *Â* PivotPegz *Â* At Dealer Expo 2004

*MotoTech Solutions, Inc. unveiled their flagship product *Â* PivotPegz *Â* (www.pivotpegz.com) today at the 36th Annual Dealernews International Powersports Dealer Expo. PivotPegz (formerly RidgeBack PivotPegz) are the only off-road motorcycle footpeg on the market that combine strength and durability with technical innovation to create a footpeg that improves stability and riding performance.*

(PRWEB) February 13, 2004 --MotoTech Solutions, Inc. unveiled their flagship product *Â* PivotPegz *Â* (www.pivotpegz.com) today at the 36th Annual Dealernews International Powersports Dealer Expo. PivotPegz (formerly RidgeBack PivotPegz) are the only off-road motorcycle footpeg on the market that combine strength and durability with technical innovation to create a footpeg that improves stability and riding performance. Available in both stainless steel and titanium, PivotPegz offer the consumer unparalleled performance at a competitive price.

Â PivotPegz are designed to increase grip and enhance riding performance. *Â*, said James Scala, MotoTech Solutions President. "By providing comfort, stability, strength and the unique natural pivoting motion, off-road motorcycle riders will immediately gain an advantage in competition. *Â*

Developed with the assistance of top international motocross riders, PivotPegz overcome the disadvantages found on standard pegs by using a patented design that allows the peg to tilt forward and backward with the natural motion of the rider's foot. The pivoting motion coupled with the unique grip pattern of the teeth provides the rider with a stable and naturally conforming ride. *Â* When we decided to manufacture PivotPegz we knew we had a solid product that would revolutionize the off-road motorcycle footpeg market. *Â*, stated Scala. *Â* Once the rider rides a bike with a pair of PivotPegz they immediately feel more in sync with the bike and gain the confidence needed for a competitive edge. *Â*

PivotPegz are manufactured in the U.S.A and are available in stainless steel and titanium. MotoTech Solutions is the exclusive manufacturer and US distributor. Distributors have been established in Alaska, Canada, Europe, and Australia.

MotoTech Solutions, Inc. is a leader in innovative off-road motorcycle product manufacturing. MotoTech Solutions is based in El Dorado Hills, CA.
