

Sparta Police Department Selects StarPath Mobile® GPS Fleet Management System for Vehicle Tracking and Safety

The StarPath Mobile® system will enable the Sparta Police Department (NJ) to view the location of their police vehicles in real-time, gaining a better understanding of resource deployment and increasing the safety of their officers.

Union, NJ ([PRWEB](#)) January 7, 2009 -- [StarPath Technologies, LLC](#) today announced that the [Sparta Police Department \(NJ\)](#) has selected StarPath Technologies, LLC as their vendor to implement the [AVL](#) management solution for their police vehicles. StarPath Mobile®, will provide the police department with the ability to view the exact location of each vehicle, increasing the safety of their officers and the ability to deploy tracking devices to help fight crime.

The web-based software is also capable of generating reports that enables the police department to analyze police vehicle movements for training purposes and to ultimately enhance their service to the community.

"The purchase concludes our industry research and trial period and we have found the StarPath Mobile software to be superior to competing products. We are looking forward to the implementation and to working with the StarPath Technologies team," said Ernest Reigstad, Chief of the Sparta Township Police Department. "StarPath Technologies provides an easy to use solution that supports a shared services model, which is significant for our department because Sparta dispatches for multiple jurisdictions," added Lieutenant Mark Rozek.

"StarPath Technologies is dedicated to bringing value to the Sparta Police Department by providing them with a powerful system to help Sparta fully optimize their fleet of police vehicles," said John P. Lucich, President of StarPath Technologies. "We appreciate the opportunity to help this law enforcement agency achieve their AVL goals and increase officer safety," added Lucich.

About the StarPath Technologies:

StarPath Technologies, LLC is a leading provider of web-based applications for the government and corporate markets and was a successful spinoff of the Network Security Group, Inc. in June 2008. The president of the company is a former 17 year veteran of law enforcement and was the lead software architect in the design of the system.

StarPath Technologies provides a unique approach in the area of Automatic Vehicle Location (AVL) and enables law enforcement agencies to effectively and easily implement StarPath Mobile, a cost effective solution that enables police departments to house the data on their site.

StarPath Technologies offers government agencies a free thirty day trial period at no cost or obligation. StarPath Technologies will ship modems to potential clients that meet our criteria and enable them to track two to three of their vehicle in real-time on a system dedicated to their vehicles only.

[StarPath Mobile](#) is the only web-based multi-agency system that allows several clients to access their vehicles on a single installation. The system can be configured to view their agency vehicles only or to be able to view the vehicles of all agencies. It is the perfect solution for shared services and or the centralized dispatched of numerous jurisdictions. Multiple security levels control access to view the vehicles. StarPath Technologies does not charge police departments for configuring additional agencies on the single installation, as it is a standard

feature of the StarPath Mobile® system.

Interested departments should contact StarPath Technologies, LLC at (888) 674-4872 or by email at info@starpathmobile.com. Additional information is available on their website at <http://www.starpathmobile.com>.
