

## **InventHelp Invention Ensures Proper Visibility for Drivers (CCP-643)**

*Pittsburgh-based InventHelp is a leading inventor service company, and is attempting to submit the Sun Blocker to appropriate companies for their review.*

Pittsburgh, PA ([PRWEB](#)) December 31, 2013 -- Since a driver's vision is crucial for road safety, glare from the sun or other vehicle's headlights is a significant factor in accidents.

"Imagine driving on a sunny day and not being able to see properly," said an inventor from Hillside, Ill. "You reach to the backseat to grope for your sunglasses then put your visors down - but to no avail. Missing a street sign is only one of your problems at this point, because the driver in the car ahead of you doesn't know that you'll be slamming on your brakes and a collision will occur."

In order to solve this problem, she designed the easy-to-use Sun Blocker, which provides a safer way to drive in bright sunlight or at night. This ensures proper visibility and helps to prevent accidents, injuries and fatalities. Overall, it promotes peace of mind. The invention is compatible with any vehicle and producible in different colors.

The original design was submitted to the [Chicago office of InventHelp](#). It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 12-CCP-643, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
