

InventHelp Invention Allows For More Convenient Circulation of Fresh Air in a Vehicle (DET-4879)

InventHelp, a leading inventor service company, is submitting the AUTO BREEZE to appropriate companies for their potential feedback.

PITTSBURGH, PA ([PRWEB](#)) July 18, 2016 -- An inventor from Detroit, Mich., knows how important it is to avoid discomfort and stress while driving. "It's often nice to have the windows down while driving, but the pleasure can be short-lived if insects or debris fly or blow in," he said. "This is why I conceived of the AUTO BREEZE."

This invention provides a more convenient way to circulate fresh air in a vehicle interior. It prevents insects and/or debris from flying or blowing in, which avoids discomfort and hassle. Suitable for cars, trucks, SUVs, campers, etc., the invention also can be premanufactured in new vehicles.

The original design was submitted to the Detroit office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 12-DET-4879, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
