

## **Sharper Edge Engines Announces the Launch of a New Website to Make Buying Used Engines Online Easier**

*[Family owned and operated Business Sharper Edge Engines LLC](#) today announced their new website to provide an easier way to buy used engines online.*

([PRWEB](#)) July 19, 2016 -- Running Sharper Edge Engines LLC as a used engine business for past ten years has been a pleasure. We launched a new website. Visitors can buy used engines online a lot easier. It's a very clear and easy navigating website. Customers are going to be a lot more satisfied. They can find their product simpler and faster.

Sharper Edge Engines has been trying to keep the business small so the customers are taken care of very well. "That is the best way to maintain the company and make a good living, since clients are 100% taken care of," said Jack and Yalda, the owners at Sharper Edge Engines, LLC.

Nationally operated company Sharper Edge Engines LLC is one of the largest locators of Replacement Engines and Transmissions in the United States and Central and South America. This engine locator group is a very rare, honest online business for locating all used or remanufactured auto parts.

In ten years they became one of the most honest online companies.

"Sharper Edge Engines LLC doesn't make much money, but we're happy as long as our clients are happy and that's how life becomes easy," Yalda, the owner, said.

Customer are responsible for:

- 1- changing oil on time.
- 2- following the Engine installation guidance in the following link which is available on the website:  
<https://www.sharperedgeengines.com/used-engine-installation.php>
- 3- changing the main seal and not overheating the engine.

How to sell a used engine:

When a customer calls to buy a replacement part they are given a few quotes based on what is available. The VIN check has to be done to make sure of a correct mileage as a quote. That makes the customer and the seller of the engine sure and give both of them confidence.

Make sure to give the client a copy of the auto check or the car fax of that VIN.

The client has to be sure of the used engine he/she is purchasing from us!

Sharper edge engines LLC is very proud and honest and has been working hard in this field to make sure all the customers are satisfied.
