

## **InventHelp Inventors Develop High-Tech Vehicle Security System to Revolutionize the Car Industry (NJD-1056)**

*InventHelp, founded in 1984 in Pittsburgh, is submitting the GUARDIAN ANGEL to companies for their consideration.*

PITTSBURGH, PA ([PRWEB](#)) July 23, 2016 -- "I hated how there was nothing out there to protect my vehicle when I parked it and walked away," said one of two inventors of the Guardian Angel Team. "I wanted a system that would provide more complete coverage using advanced technology. With my invention, I could rest assured that my vehicle is protected."

They developed the patent-pending GUARDIAN ANGEL to provide total vehicle security. The system safeguards the vehicle from damages and theft. It assists law enforcement with apprehending and prosecuting vandals and thieves. The unit also keeps other drivers from accidentally bumping, denting or scratching the vehicle, and then leaving the scene. This offers added peace of mind when leaving a vehicle unattended. Furthermore, the invention is adaptable for use with any new or existing vehicle.

The original design was submitted to the New Jersey office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-NJD-1056, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
