

Safety System Prevents Children From Being Left Behind in Vehicles - Designed by InventHelp Client (ROH-194)

Founded in 1984, InventHelp is submitting the INTELLIGENT BABY SEAT to companies for their review and potential feedback.

PITTSBURGH, PA ([PRWEB](#)) July 27, 2016 -- After hearing about children being left behind in vehicles, an inventor from Cheektowaga, N.Y., decided that there needs to be a way to prevent this from happening.

The easy-to-use INTELLIGENT BABY SEAT is a system that ensures that a child is not left behind in a vehicle. This helps avoid fatalities. Overall, it promotes safety and peace of mind. The system can be produced in many design variations.

The original design was submitted to the Rochester office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-ROH-194, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
