

Inventor an InventHelp Client Develops Trash Can for a Pickup Truck Bed (SKC-116)

InventHelp, founded in 1984 in Pittsburgh, is submitting the TRUCK TRASH to companies for their potential interest.

PITTSBURGH, PA ([PRWEB](#)) July 28, 2016 -- "As an electrician and a farmer, I am always carting things around in my pickup truck," said an inventor from Burlington, Iowa. "I recognized the need for a trash can that I could keep in the bed, and this personal and professional need inspired me to come up with this idea."

He created a prototype for the TRUCK TRASH to provide a convenient place to dispose of waste. The unit ensures that a trash can is readily available for use. It keeps trash from building up inside the cab or truck bed. The device is designed to be easy to load into and out of the bed. It promotes responsible behavior and discourages littering. In addition, the invention is adaptable for use with any pickup truck.

The original design was submitted to the National Sales Office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-SKC-116, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
