

Inventor and InventHelp Client Designs Improved Clevis Pin (TOR-9501)

One of America's leading inventor service companies, InventHelp is submitting the ULTIMATE CLEVIS PIN to companies for their potential feedback.

PITTSBURGH, PA ([PRWEB](#)) July 28, 2016 -- As a mechanic with over 20 years of experience, an inventor from Aurora, Ontario, Canada, is familiar with the deficiencies of conventional clevis pins. His design eliminates these deficiencies.

The patent-pending ULTIMATE CLEVIS PIN prevents seizing and premature wear in order to enhance brake safety. It also doesn't require forceful and damaging removal. Overall, it saves time, effort, maintenance and labor costs. Ergonomic, easy to use and producible in different sizes, the pin is ideal for the tractor-trailer industry, farmers, mechanics, motorcyclists and aviators.

The original design was submitted to the Toronto office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-TOR-9501, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
