

World Patent Marketing Invention Team Introduces the YT60 Replacement Seat, an ATV Part Invention that Will Help Restore Old Vehicles

World Patent Marketing Reviews An ATV Part Invention. Will The YT60 Replacement Seat Foam Be the Next World Patent Marketing Low Cost Success Story?

Miami, FL ([PRWEB](#)) July 28, 2016 -- [World Patent Marketing](#), a vertically integrated manufacturer and engineer of patented products, announces the YT60 Replacement Seat Foam, an ATV part invention meant to make riding YT60s more comfortable.

“The ATV industry is worth \$6 billion,” says Scott Cooper, CEO and Creative Director of [World Patent Marketing](#). “This is a relatively small but growing market that could see a boom in the next few years.”

“The YT60 is a type of small ATV that is coming back into fashion,” says Jerry Shapiro, Director of Manufacturing and World Patent Marketing. “However, most of the vehicles of this type are relatively old and have started falling apart. This new invention will help restore them to their glory days.”

The YT60 Replacement Seat Foam is an ATV part invention that will replace old YT60 seats. These bikes are starting to become more and more popular but they’re also fairly old. At this point, most of them need new seats. The old seat gets brittle over time and falls apart. This Replacement Foam Seat is a more comfortable and new version of the old seat that won’t fall apart. It is also significantly more durable and greatly improves on the original. Companies no longer make this vehicle or parts for it so this invention is very helpful for any YT60 owners that can’t find replacement seats. This [new patent](#) will recreate a market that was previously unavailable.

“I’ve always enjoyed racing those little three wheelers in the winter time during ice races,” says inventor Rob V. “They’re rare little bikes with lots of potential, but now with those new seat foams, the racing will be even more enjoyable because of the renewed comfort. It is becoming more and more popular for these bikes to reappear in special events. Getting parts back out there will give them another chance to sustain their existence and give those young future riders that racing feeling again.”

The YT60 Replacement Seat Foam is an ATV part invention that will make riding on YT60s a more comfortable experience.
