

Hyndsight Vision Systems Welcomes a New Retail Outlet

Lazydays RV to Retail Hyndsight's Wire-Free Rear View Vision System

Peterborough, NH ([PRWEB](#)) August 04, 2016 -- Hyndsight Vision Systems has recently become an online and retail vendor partner with Lazydays RV, one of the country's largest RV dealership's. Hyndsight's versatile new portable, rear view wire-free vision system will be featured in the company's ecommerce store – [accessories.lazydays.com](#) and in various retail locations. The retail store locations include, Seffner FL, Tucson AZ, Aurora CO, Johnstown CO and Longmont CO.

Hyndsight Vision Systems is taking a big step forward in the consumer vision industry with the introduction of their new portable, wire-free rear view vision system called Journey. This turnkey system is comprised of a custom designed camera and monitor with a sunlight readable screen, antenna set, and two mounts in a hard shell case. Journey is rugged, weather resistant and provides a “real-to-life” visual field. The system provides real-time video stream through a direct wire-free connection (camera to monitor) and a clear image that can transmit up to one-third of a mile with direct line of sight.

One of the revolutionary highlights of Journey is that it can be mounted literally anywhere, with the ability to pair-up to four cameras per monitor. It can operate four to five hours before charging is required or can be optionally hard-wired. Three product lines with different lens angles are available, offering additional flexibility and options for use in any environment.

“So many so-called 'wire-free' rear vision systems leave consumers disappointed because most of these systems need to be hard-wired for power and antenna connections which can be time consuming and result in costly installation fees on top of the cost of the unit,” says Melissa Thompson, CEO of Hyndsight. “Obstructed vision is a major issue in the RV industry, and Hyndsight's vision system provides drivers with a constant clear field of vision preventing unnecessary collisions while driving and changing lanes or reversing. We're truly honored to have Lazydays understand these issues and become part of the Hyndsight Team of retailers.”

Founded in 2011, Hyndsight Vision Systems' corporate offices and distribution center is located in Peterborough, NH. The company has secured world-wide distribution agreements with national and international companies and has several new products in development.
