

## **InventHelp® Client Patents “B.R. Chrome Walls” – Invention Are a Stylish, Modified Set of Tires**

*InventHelp, based in Pittsburgh, Pa., is submitting the B.R. Chrome Walls to appropriate companies for their consideration.*

PITTSBURGH, PA ([PRWEB](#)) August 12, 2016 -- [InventHelp](#), a leading inventor service company, announces that one of its clients, an inventor from Washington, DC, has designed modified tires so that they are easier to care for and clean. This invention is patented and a prototype is available.

The “B.R. Chrome Walls” would provide a more convenient alternative to standard whitewalls, and could help reduce costs for the car owner. It would minimize cleaning time in order to avoid back strain and save time. Featuring an aesthetic, stylish design, the B.R. Chrome Walls could make the vehicle look more appealing.

The tires would be similar in construction and design to conventional versions, but instead of featuring white or black walls, they feature chrome ones. To clean, the user simply has to wipe the chrome instead of scrubbing and buffing.

“I wanted my car to have a nice new set of whitewall tires, but I could not afford them,” said the inventor. “Not wanting to sacrifice style just because I did not have much money, I invented a set of chrome attachment rings that are easier to care for and maintain, and look great.”

[InventHelp](#) is attempting to submit the invention to companies for review. If substantial interest is expressed, the company will attempt to negotiate for a sale or royalties for the inventor. For more information, telephone Dept. 12-WDH-389 at (800) 851-6030.
