

Infocast's Driverless Cities Summit Drives into San Francisco This October

Navigating the Road Ahead to Autonomous Vehicle Implementation

San Francisco, CA ([PRWEB](#)) August 16, 2016 -- Infocast is pleased to announce the Driverless Cities Summit which takes place in San Francisco on October 26 – 28, 2016. The event will be co-located with the 9th annual Microgrids Summit.

The transportation industry is in the midst of a revolution with innovative advancements in remote sensors, mapping, and connectivity. Autonomous Vehicles have been the center of discussion for quite some time due to the benefits they provide to the transportation system such as reduced congestion and emissions and the possibility of completely eliminating traffic deaths.

Autonomous vehicles catalyze a greater transformation of urban mobility and our aging infrastructure. However, in order for the vehicles to work, essential policy revisions and extensive reconstruction of our infrastructure must be made.

Attend [Infocast's Driverless Cities Summit](#) to hear the latest activities of regulators, the modern designs for smart city planning, and new connectivity apps and technology. You'll also hear from early urban mobility adopters and gain insight into the adoption timeline and growth opportunities on autonomous vehicles.

The Summit will be preceded by the Pre-Summit Briefing: New Players + New Partners in the Automotive Industry, which will focus on collaborative efforts, new partnerships, and the tech ecosystems around autonomous vehicles, urban mobility, and intelligent transportation systems.
