

Ramp Allows For Easy Attached-Garage Entrance and Exit for Wheelchair Users - Designed by InventHelp Client (BMA-4766)

A Pittsburgh-based invention firm, InventHelp is submitting the SELF STORING WHEELCHAIR RAMP to companies for their review.

Pittsburgh, PA ([PRWEB](#)) December 06, 2016 -- When his son became sick he had to rely on a wheelchair to get around, and getting to and from the attached garage in the winter was difficult for him. "This inspired me to design a safe and reliable way for him to do this without having to go outdoors," the inventor said.

He then created a prototype of the patent-pending SELF STORING WHEELCHAIR RAMP, a special ramp that provides an easier and safer way for a wheelchair user to move to and from an attached garage that's at a lower level than a home. This prevents struggle and hassle, as well as promotes independence and dignity. It also eliminates the need to go outdoors in inclement weather.

Ergonomic, space-saving and easy to use, the SELF STORING WHEELCHAIR RAMP is ideal for all wheelchair users and suitable for use in households and businesses.

The original design was submitted to the Boston office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-BMA-4766, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
