

InventHelp Invention Optimizes Safety for Police Officers on Traffic Detail (BMA-4773)

InventHelp, a leading invention company, is submitting the SAFETY MAT to companies for their review.

PITTSBURGH, PA ([PRWEB](#)) December 06, 2016 -- Police officers are often put on traffic detail, which requires them to stand in the middle of a street or intersection and direct the flow of traffic around a construction or hazardous site. This leaves him or her vulnerable to accidents due to drivers not being able to see him or her adequately, so an inventor from Randolph, Mass., decided that a way to optimize officers' safety is needed greatly.

The patent-pending SAFETY MAT enables a police officer to perform traffic detail in a safer manner by optimizing his or her visibility so that drivers can see him or her more clearly from a distance. Because this creates a protective perimeter around the officer, it helps avoid accidents that can result in injury or fatality.

Ergonomic, weatherproof, durable, portable, easy to use and producible in different design variations and versions, the SAFETY MAT is designed to streamline the process and promotes peace of mind.

The original design was submitted to the Boston office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-BMA-4773, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
