

## **KIDS-KOMFORT Keeps Babies Warm in Car Seats During Cold Weather - Designed by InventHelp Client (BRK-1216)**

*A leading inventor company, InventHelp is submitting the KIDS-KOMFORT to companies for their possible feedback.*

PITTSBURGH, PA ([PRWEB](#)) December 06, 2016 -- Having experienced transporting a newborn in a car seat during cold weather, two inventors from Oxford, Ala., decided to develop an easy and effective way to keep babies warm in such a situation. "To meet this need, I've designed the KIDS-KOMFORT," said one inventor.

This patent-pending accessory ensures that a baby is warm while riding in a car seat during cold weather. It keeps him or her comfortable, as well as avoids the development of a cold. Overall, it promotes peace of mind for parents and guardians.

Ergonomic, compact and easy to use, the KIDS-KOMFORT serves as an alternative to conventional blankets, and it's producible in different sizes, colors and designs.

The original design was submitted to the Birmingham office of InventHelp. It is currently available for licensing or sale to manufacturers or marketers. For more information, write Dept. 15-BRK-1216, InventHelp, 217 Ninth Street, Pittsburgh, PA 15222, or call (412) 288-1300 ext. 1368.
