

## **Wave The White Flag On Gas Prices**

It's up to the public to fight higher gas prices. Politicians could help. But they won  $\hat{A} \Box t$ ! Not until citizens start showing their anger at being held hostage by foreign oil. In-the-face-patriotism is needed to help to create a dialogue on alternative energy sources. The Foreign Oil Independence League is offering an entrepreneurial solution to the obvious contempt congress has for the average taxpayer. The solution in the hands of the average citizen, could be the wonderful swift sword shearing the puppet strings that special interest lobby's have on our congresspersons.

Boca Raton, FL (PRWEB) March 23, 2004 -- You don □t have to read the news to know that gasoline prices are going through the roof. FOIL, the Foreign Oil Independence League, has for three years been rallying Americans to take our country back from the greedy overseas oil interests. Not everyone has gotten the message, even though it  $\hat{A} \square s$  been plastered on billboards, embossed on t-shirts and printed out on decals, posters and bumper stickers. So FOIL has created a new decal seen on joinfoil.org --- featuring a white flag  $\hat{A} \square I$  surrender to Big oil companies- charge me what you want." decal. If you □ re content to pay upwards of \$2 a gallon to tank up and do nothing about it, get a white flag decal, stick it on your car and let everyone know you □ re a coward. If you □ ve yielded to the big oil companies who scream poor-mouth while racking up obscene profits at your expense, let the world know. Get a white flag decal. Display it proudly -or ignominiously. Let anyone who cares know that you don □t care. A white flag decal will tell the world you ve given up, not only to big oil, but also to the desert-dwelling petro-terrorists who ve been holding America hostage for years. Surrender has never been an option for most Americans.

The  $\hat{A}\Box$  Greatest Generation  $\hat{A}\Box$  of soldiers didn  $\hat{A}\Box$ t give up when Uncle Sam called them to defend the nation in World War II. And today, the former fighting men and women of the South Dakota Veterans of Foreign Wars chapter have partnered with FOIL to fight the good fight for America.

Uncle Sam is back and on a new drive - this time he appears on a FOIL decal that tells the nation to  $\hat{A} \Box Get \ Off \ Your \ Gas. \hat{A} \Box$ 

Sam, our nation  $\hat{A} \square s$  strongest rallying symbol, is saying that the answer to America  $\hat{A} \square s$  energy problems doesn't require men and women to sacrifice their lives. It requires brainwork and creativity. It lies in the development and increasing use of alternative fuels that originate in the USA, are processed and marketed here,

using American labor that stays right here in the United States and cannot be outsourced.

That means switching to ethanol produced from grown-in-the-USA corn; biomass, solar, wind and other renewable energy sources.

It $\hat{A} \Box s$  a solution you won $\hat{A} \Box t$  hear from Big Oil, Big Corporations and Big Politicians. They won't support straight talk.

So, do you want to fight for oil independence with a  $\hat{A} \square Get$  off Your  $Gas\hat{A} \square$  decal? Or do you want to get an  $\hat{A} \square I$  surrender  $\hat{A} \square Get$  decal, then roll over and let the country go to hell?

It $\hat{A} \square$ s your decision. To be a pump patriot or not.
